

B2B CATALOG

COMPLETE COLLECTION

OUR PURPOSE:

WE CHAMPION THE DIGNITY OF WORK
AND INSTILL CONFIDENCE IN THE
MAKERS AND SHAPERS OF OUR WORLD.

THE POWER OF THE DICKIES BRAND

Dickies is the leading global brand of innovative and trusted workwear. We have a proud heritage of providing tough, quality apparel to workers for 96 years. In that time, Dickies has evolved from a bib overall to both a full range of workwear uniforms and a world-class consumer brand.

TRUSTED.

As the global leader in performance workwear, 96% of American workers recognize the Dickies brand for quality, durability, and value.

INNOVATIVE FEATURES.

Unique fabrics, features, and fits that will improve your comfort and performance.

DURABILITY.

Garments that work as hard as you do. Dickies garments last longer and retain their color better than any other workwear uniforms on the market.

IMAGE.

Uniquely designed for today's workforce, Dickies garments look as great as they perform.

SATISFACTION GUARANTEED.

Since 1922, Dickies quality has been built into every product. We will gladly replace a garment if you are not satisfied for any reason.

ICON REFERENCE GUIDE

Use this icon reference guide to help quickly identify the icons (seen throughout the catalog), and the descriptions of the unique garment features and benefits they represent.

RESISTS WRINKLES

MOISTURE WICKING

STAIN RELEASE

WATER REPELLENT

WATER RESISTANT

WIND RESISTANT

HOME WASH FRIENDLY

Home Wash

INDUSTRIAL WASH FRIENDLY

(HEAVY SOIL) This method of industrial laundering is commonly used to remove heavy soil with a combination of higher water temperature (160°F max) and harsher chemistry; pH should be held to 11.5 max. More aggressive wash formulas may be necessary to remove heavy soils but may result in accelerated color loss, deterioration in performance of retroreflective trim and overall reduced garment service life.

EXECUTIVE WASH FRIENDLY

(LIGHT SOIL) This less aggressive industrial laundering process is commonly used on garments which are lightly soiled or made of fabrics that are not designed to withstand higher wash temperatures or harsher chemistry. In a typical light soil formula, water temperatures are usually held to a maximum of 140°F and pH to 10.5 max.

FLEX

High-performance fabrics made with specialized polyester wrapped yarns for superior flexibility and exceptional abrasion resistance.

**Dickies.
Temp-iQ**

An advanced technology that cools your body while you work. It reacts to your body temperature to help keep you comfortable.

3M Scotchlite™
Reflective Material

Reflective material that keeps you visible.

CANVAS Specific:

UNDERARM GUSSET Superior range of motion no matter what the task. Also, with greater movement, shirts stay tucked in so you look great all day.

BACKSIDE PLEATS Our shirts expand to give you extra room when reaching or stretching.

BANDED COLLAR

EXTERNAL PENCIL STALL

Straight Hem / Side Vents

DOUBLE-NEEDLE STITCHING in our shirts and pants gives you a cleaner appearance.

WIDER & LONGER BELT LOOPS

DEEPER 13" POCKETS Side cargo pockets feature snap-down flaps to help keep things secure. The extra deep front pockets are reinforced so keys won't cause holes.

INSEAM GUSSET Our pants are designed to provide comfort when you bend, squat, lift or climb.

LOWER RISE (in pants)

ACTION ELBOWS Our outerwear contains an underarm gusset on the outer shell and fleece lining to give you flexibility for greater mobility.

WorkTech Ventilated Shirt

with Cooling Performance Mesh Technology

Evaporation Plus Airflow

Evaporation is our most effective way to lose heat, representing 75% of heat transport. To maximize cooling, we need a continual supply of fresh air. The Dickies® WorkTech shirt offers ventilation in key areas with breathable performance mesh, designed to bring in air and move heat away from the body.

1 Moisture wicking fabrics move sweat and heat away

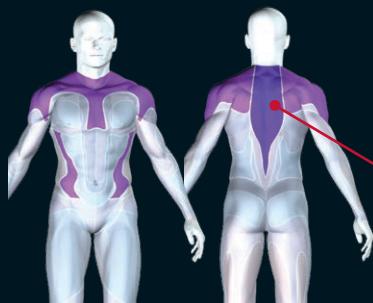

2 Airflow vents key areas

3 Evaporation Zones

The Purple and Blue colors indicate the body's high heat zone areas where your body naturally produces sweat to help cool the body temperature.

For Cooling Comfort

MEASURING FOR PROPER FIT

The following guidelines are important in measuring for proper fit.

- Give all measurements in inches.
- If the person's measurements are between sizes, order the larger size. For example: if a man's neck measures 15¾" you should order size large in a short sleeve shirt or a 16-16½" in a long sleeve shirt.

MEN'S SHIRTS

- NECK: Measurement is the circumference of the neck as illustrated.
- SLEEVE LENGTH: Measured by placing one end of the tape at bottom of the collar at the center of the back and marking the distance around the elbow to bottom of the wrist. It is often helpful to have the arm slightly bent.
- CHEST: Taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. Hold tape level and firmly but not tight.

MEN'S TROUSERS, JEANS AND BIB OVERALLS

- WAIST: Measurement is taken at the top of the hipbone over shirt (not over pants). Tape should be held snug not tight.
- INSEAM: Measurement taken from base of the crotch to top of the shoe or boot. For jeans, add 1".
- It is advisable to ask the person being measured how he or she wears their trousers. Not everyone wears their trousers or jeans the same length or height on their hips.

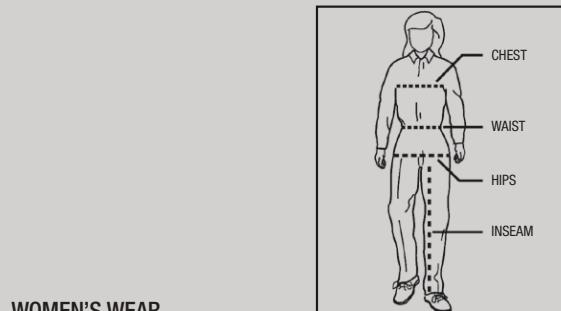

JACKETS

- CHEST SIZE: Taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. Measurement should be taken over clothing, preferably over same garment or types of garments to be worn with the jacket.
- SLEEVE LENGTH: Measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the outer edge of the wrist.

MEN'S SIZE CHARTS

PANTS, JEANS, BIB OVERALLS		
Size	Waist	Chest
S/M	28-32	34-40

3XL	54-56	19-19½
4XL	58-60	20-20½
5XL	62-64	21-21½
6XL	66-68	22-22½
7XL	70-72	23-23½

WOMEN'S WEAR

- CHEST: Measurement is taken at the fullest point of the bust. Measure across shoulder blades with arms relaxed down at sides, keeping tape parallel to the floor. Hold tape level and firmly but not tight.
- WAIST: Measurement is taken around the natural waistline. Keep the measuring tape comfortably loose.
- HIP: Measurement is taken by standing with heels together. Keep tape straight and parallel to the floor, measure around the fullest part.

CAUTION: Garments contained in this catalog meet government flammability Class 1 requirements but do not provide protection from ignition sources, molten substances or chemical exposure. Special flame-resistant garments are available if required.

Product images and fabric swatches shown here are photomechanically reproduced. As a result, colors may vary from actual samples.
