Print Stitch Patches

Up to 6 Thread Colors

We've combined two of our favorite branding methods—embroidery and high-definition printing—to create one amazing patch.

You get the classic texture and 3D feel of real stitching, but with the ability to show off photo-realistic details and every color in the rainbow. It is the perfect solution for complex logos that are "too detailed" for traditional embroidery.

Woven Patches

Unlike traditional embroidery that uses thicker thread, these patches use a special "tight-weave" process. This allows us to capture tiny details and crisp text that other patches might miss, all while keeping a smooth, classic feel.

It's the perfect choice for logos with fine lines or small lettering that need to look sharp and stay flat on your gear.

- High-Definition Detail: The thin, interlaced threads make even the smallest parts of your logo easy to read.
- 75 Thread Colors: Choose from a wide range of colors to get your branding just right.
- Custom Finishes: Go with a Stitched Border for a classic patch look or a Borderless Edge for a sleek, modern style.
- Light & Flat: These patches are thin and flexible, so they don't feel bulky on lightweight shirts or hats.
